

DB 360 Starter Kit—the Solution for Security and Structured Wiring Installations

DB 360 Starter Kit comes complete with compression tool, strip tool, fit tool and selection of one-piece bubble connectors designed with security professionals in mind—including Plenum connectors!

Starter Kit Demonstrates Our Complete DB System....

- DB Starter Kit contains a compression tool, a strip tool and a flaring tool, with a **selection of universal F, RCA and BNC connectors in sizes 59 and 6.**
- In addition, the **DB 360 System offers a full line of plenum sized connectors for installs requiring plenum wiring.** ICM is the premier manufacturer of plenum sized connectors, and our starter kit includes **BNC connectors for various sizes of plenum cable.**
- The DB 360 Starter Kit includes all necessary tools for solid security and structured wiring installations. ICM designed the DB 360 System as a complete solution for each step of the installation process, **reducing costly errors and training time.**
- Our **patented CablePro radial bubble compression (RBC) tool and new line of bubble connectors** are designed to work together. And the CPLCRBC also works with F-Conn standard F, RCA and BNC Series connectors so **installers can reduce the number of tools they carry.**

DB System Creates Solid Compression Connections...

- The DB 360 compression connection system creates **two 360 ° compression connections** (one interior and one exterior) providing a **permanent, “double bubble” connection.**
- Ideal for security cameras and other exposed wiring installations. The unique double bubble connection **provides superior protection against moisture leakage limiting poor signal quality due to the elements.**

Connectors with ICM’s Patented Non-Blind Entry...

- ICM’s **patented floating pin and non-blind entry design allow installers to see the wire in the pin before compression.** The floating pin moves up independently as the wire is inserted, indicating proper positioning of the center pin. Installers see the wire entering the pin at the base of the connector, **ensuring a solid, secure connection every time. No guesswork involved.**

DB connectors included in Starter Kit:

- DB6U (25)
- DB59U (25)
- DB59RCAU (10)
- DB6BNCU (10)
- DB59BNCU (10)
- DB59BNCPL4 (10)
(Also available in PL2 and PL3 sizes.)

Tools included in Starter Kit:

- CPLCRBC
Compression Tool (1)
- PSA59/6 Strip Tool (1)
- FIT-59 Fit Tool (1)
