

Introducing the NEW UniCam® High-Performance Connector Installation Tool Kit

The UniCam High-Performance Tool Kit was created in order to improve overall installation quality, reduce risk of error, lower total time & total cost of installation, and provide an easier method for installers to learn and perform consistently.

Case

- Free connectors located in container on the side
- Ergonomic, 5s design with left-to-right tool layout in order of use
- Billboard delineating the 4 main steps in the installation process & color coordinated to the base

Installation Tool

- Color coded buttons—red reset and green go buttons
- High-contrast fiber lead-in area makes to insert prepared fiber
- Crimp jaws are now black to improve visibility while inserting prepares fiber

Tools & Accessories

- All-in-one, three-hole stripping tool for fiber jacketed cable
- Guided, step-by-step visual instructions use “global” language of pictures; little to no text
- 25 free connectors provided with each kit
- Register kit to receive free 2.5 ml port cleaner

Unicam's high performance Connectivity Solutions includes LC, SC, and ST Compatible Connectors, multimode and single-mode, with innovative, craft-friendly installation tools that enable virtually error-free termination.

Receive 25 connectors with the purchase of TKT-UNI-CAM-PFC toolkit. Valid through 1/1/13 to 6/28/13.
