RACK-TO-RUNWAY MOUNTING PLATE USING HAT-SHAPED BRACKET

Secures cable runway to the top of Standard and Universal equipment racks without intruding into valuable mounting space. The combination of the flat plate and hat-shaped bracket form a clamp around the rack's top angles or top bars. Mounts either parallel or perpendicular. For proper attachment of 6" runway, use top bars (13045 Series) rather than top angles on your rack.

- Various sizes accommodate our popular cable runway widths and rack depths
- Includes brackets and hardware to match 1.25" high or 1.5" high rack top angles (current and past models of CPI Standard and Universal Racks)
- Kit consists of:
 - 1 mounting plate
 - 2 hat-shaped brackets
 - 2 J-Bolts, 5/16-18 x 2-1/4"
 - 3 hex nuts, 5/16-18
 - 3 split lock washers, 5/16"

**Parallel Mounting on
