Webinars: www.BlueWaveSecurity.com/sales/upcoming-webinars

BlueWave Security team offers sales and technical support by phone, by remote access dial in, and through scheduled appointments onsite.

Certified Installer Program

The BlueWave Security Installer Program provides advanced product and software training in working with all components of the BlueWave access control system.

We offer trainings by webinar or on-site, as scheduled. Certified Installers receive access to TechTips, an online technical resource created by BlueWave Security specifically for our Installer Program to advance to the next level.

Centralized Managment

Remote Network Administration

The BlueWave Advantage

• Solid IP-Based Access Control System

Proven - hundreds of end-product user customers since 2006

Scalable - ability to expand from one door to thousands at one location or at multiple sites

Reliable & Secure - everything runs on your physical network, not cloud dependent

• One Source Provider of Hardware, Software & Support

One Stop - supply a complete end-to-end system from the door hardware through to the network infrastructure

Experience - a pioneer in IP access control with a highly knowledgeable team in physical security management, product development, engineering and installation

• BlueWave Saves Time and Money

Quick ROI - save 20-30% compared to a panel based system in material and labor costs

Timely Projects - eliminate long cable runs and save on project completion time

Upfront Costs - expand and purchase doors as needed with no worry of annual fees or required contracts

Lowest Cost of Ownership - for purchase and system expansion of any access control system in the industry
