ENHANCED RACK SERIES

NEW!

4PLRB4-8
Ladder Rack
Bracket with
3" bend radius
for CAT 6 Cables

Side airflow baffle
for exhaust

4PBSF24-36/
4PSPV24-36
Baffle support
frame with side
panel

CM-47
Cable Management
"Fingers" can be
installed in multiple
locations

4PBK24-36
Side airflow baffle
for cool air intake
*Baffles are designed
to work with our
enhanced rack
products and
offer degrees of
adjustability in depth,
based on specific
manufacturer's
requirements for side
airflow switches and
equipment.*

ESF16
Equipment Support
Frame to support
switch equipment

VCM8-FO-ER
8" Vertical Cable
Manager (shown
without doors)

VSBK9-14
Variable spacer
bracket kit (includes
4 brackets,
2 top/2 bottom)

*Used to install a
baffle, 5 or 8" VCM
between two racks or
at the end of a row.*

CMR-45U16
Cable Management
Rack

VD4PM6-2436
Variable Depth
4 Post Rack

VCM12-FO-ER
12" Vertical Cable Manager
(shown without door)

FoamBlock™
Air Barrier

Great Lakes is pleased to announce several new updates to its Enhanced Rack (ER Series) portfolio, to include a new version of the CMR-45 Cable Management Rack, at a depth of 16.25". New Variable Depth Four Post Racks offer a single platform that can accommodate servers, switches and high density cable management from various manufacturers such as Cisco and Juniper. These racks utilize proprietary, tool-less side rails, allowing for a variety of depths, from 24" to 36", in one-inch increments. Great Lakes offers ESF (Equipment Support Frame) brackets to provide additional support to switches, while allowing them to be securely mounted. A portfolio of cable managers, ladder rack brackets and air flow baffles in the ER Series help to create a complete data center solution.

MAJOR COMPONENTS OF ENHANCED RACK SERIES

VARIABLE DEPTH 4 POST RACKS

- Tool-less side rails snap into place and are “locked” with a plastic rivet
- 19" EIA 310-E compliant mounting rails; 45 RMU
- Available with 3/8" sq. (M6) or #12-24 mounting
- Allows for a variety of depths, from 24 to 36"
- Mounting holes along top of rack allow ladder rack brackets to be mounted
- Front, side, and rear of all channels feature Great Lakes’ Flexible Mounting Profile (FMP), a series of holes along the rail, but outside of the mounting pattern, that allows installation of cable management and other accessories
- Universal PDU mounting brackets mount to the FMP of the rails; button mounting allows PDUs from nearly all manufacturers to be mounted

SIDE AIRFLOW BAFFLES

- Full height baffles that direct cool air in and exhaust air out of side-to-side airflow equipment
- Hinges allow baffle to adjust to any angle or depth (accommodates racks set at any depth)
- Laser knockouts with brush grommet allow cable pass through while preventing bypass airflow

5" AND 8" VERTICAL CABLE MANAGERS (VCM)

- For use between any two racks or at the end of a row
- Plastic cable managers easily attach to racks
- 5" VCM includes snap-on covers; 8" VCM includes hinged covers
- Front only configurations are able to install in front of baffles

12" VERTICAL CABLE MANAGER (VCM)

- For use between two racks (excluding 2 posts)
- Includes dual hinged door for left or right hand opening
- Metal channel with cable openings and attachment points for cinch straps

EQUIPMENT SUPPORT FRAME

- Fixed bracket available for the CMR-45U16
- Variable depth bracket available for 4 Post Racks set between 24-29"
- Easily mounts to provide extra support for heavy switches
